

# VAKSIMUNE® IBD MHV

STAY ON GUARD  
SINCE DAY ONE

# VAKSIMUNE® IBD MHV

is a live vaccine of Infectious Bursal Disease (IBD) virus, suitable & effective for broiler, layer, and colored chicken, providing protection from sub-clinical to very virulent IBD.

## INDICATION

VAKSIMUNE IBD MHV is used to protect chickens against IBD. A few days after administration the vaccine will stimulate high immunity against IBD without causing side effects.

## BENEFITS

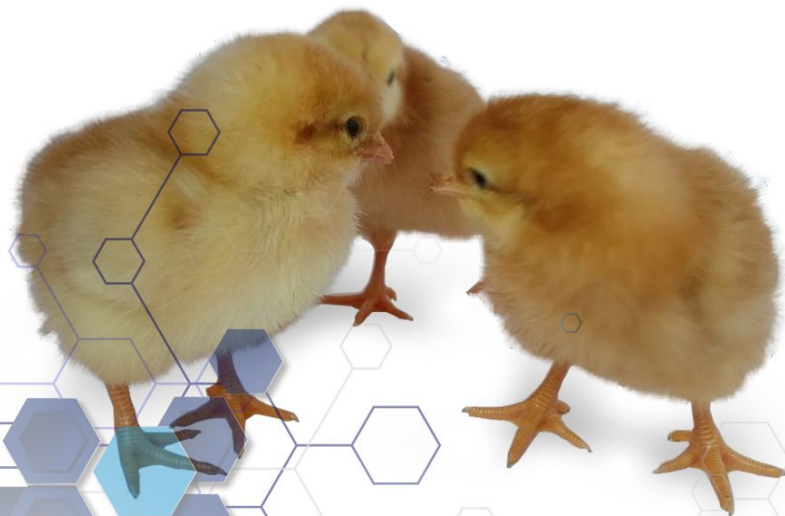

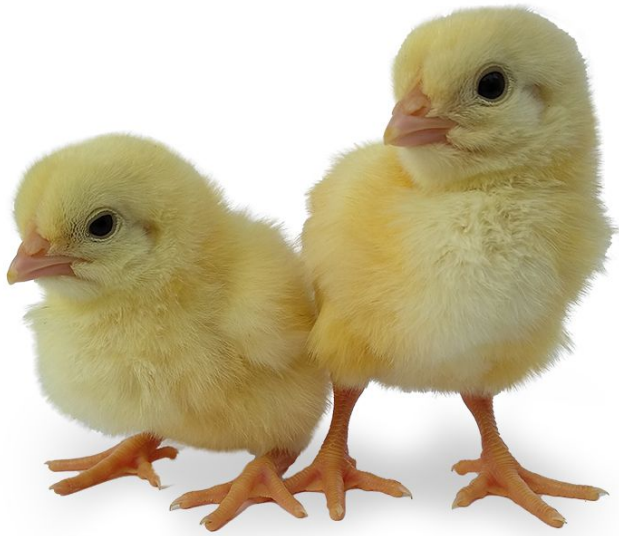

- ✓ No Interference with Maternal Antibodies
- ✓ Full Protection in Single Shot Application
- ✓ Works on Broiler, Layer and Colored Chicken
- ✓ Faster Antibody Titer formation

## COMPOSITION

VAKSIMUNE IBD MHV contains Infectious Bursal Disease (IBD) live virus of Intermediate Plus strain in freeze dried.

## ADMINISTRATION & DOSAGE

VAKSIMUNE IBD MHV applied subcutaneously for day old chick (DOC) in the hatchery using automatic injector or In Ovo.
